CARLOS BRUNO CARVALHO MOREIRA

SENIOR QA AUTOMATION ENGINEER / SDET

Búzios, RJ - Brazil | +55 22 98839-6545 | brunobzs@gmail.com
LinkedIn: linkedin.com/in/brunobzs | GitHub: github.com/brunobzs

PROFESSIONAL SUMMARY

Senior QA Automation Engineer / SDET with extensive experience leading automation strategies, building scalable test frameworks from scratch, and owning end-to-end release quality across web and mobile platforms. Expert in TypeScript, Node.js, Playwright, Cypress, REST and GraphQL API testing, and PostgreSQL data validation. Proven track record of integrating test suites into CI/CD pipelines within fully remote, international Agile environments (UK, USA, Israel, Australia). Adept at leveraging AI-assisted coding tools (Cursor, Claude Code, GitHub Copilot) to boost testing efficiency, optimize code coverage, and accelerate release cycles.

TECHNICAL SKILLS

- **Programming & Runtimes:** TypeScript, JavaScript, Node.js, Python, SQL
- **Automation Frameworks:** Playwright, Cypress, Selenium, Appium
- **API Testing:** REST APIs, GraphQL, Postman, JSON Schema Validation
- **Databases & Data Management:** PostgreSQL, DB Validation, Test Data Management (Seeding/Cleanup)
- **DevOps & CI/CD:** Git, GitHub Actions, Jenkins, Docker, CI/CD Pipeline Integration
- **AI-Assisted Engineering:** Cursor, Claude Code, GitHub Copilot
- **Testing Specialties:** End-to-End (E2E) Testing, Mobile (iOS & Android), Web Automation, Framework Architecture from Scratch, Regression & Performance Validation
- **Methodologies & OS:** Agile/Scrum, TDD, QA Governance, Linux, macOS, Windows/WSL

PROFESSIONAL EXPERIENCE

Senior QA Automation Engineer / SDET | Zoocha (UK / Brazil)

10/2025 – Present

- Define QA automation strategy and lead technical decisions, establishing coding standards and governance across cross-functional Agile teams.
- Architect and build scalable automated test frameworks from scratch using JavaScript/TypeScript, Node.js, Cypress and Playwright for web and API layers.
- Automate and validate complex REST and GraphQL APIs, verifying payload integrity, response schemas, and edge-case behaviors.
- Perform database testing and test data management on PostgreSQL, writing advanced SQL queries and automated setup/teardown scripts.
- Embed automated test suites directly into CI/CD pipelines (GitHub Actions/Jenkins) to execute on Pull Requests, enforcing quality gates before production deployments.
- Leverage AI development tools (Cursor, Claude Code) to accelerate test script development, refactor framework code, and optimize maintenance.
- Work with full autonomy in a remote international setup, taking complete ownership of release quality.

QA Automation Engineer | Personetics (Israel / Brazil)

04/2024 – 10/2025

- Designed, built, and maintained robust E2E automation suites using Playwright (TypeScript) and Selenium for web and mobile (iOS & Android) applications.
- Conducted comprehensive REST API testing and automated integration scenarios using Node.js, reducing manual validation effort by over 60%.
- Validated database persistence and transactional integrity using PostgreSQL queries during key release cycles.
- Integrated automated regression tests into CI/CD build workflows, providing fast feedback loops to R&D teams.

- Partnered with international stakeholders to assess technical risks, manage release quality, and resolve critical issues ahead of production deployment.

QA Engineer | Shaw and Partners (USA) 05/2023 – 04/2024

- Developed automated test scripts using Cypress, Playwright and JavaScript/TypeScript to validate core web application features.
- Executed REST API testing and validated database states to ensure end-to-end data accuracy.
- Established QA standards, testing workflows, and test data preparation strategies across Agile teams.
- Integrated test scripts into CI/CD environments and managed issue tracking in Jira to maintain stable build pipelines.

QA Engineer Jr. | io.insure (USA / Australia / UK) 01/2022 – 04/2023

- Built Cypress automation scripts to validate complex business rules, expanding overall test coverage.
- Applied Test-Driven Development (TDD) concepts to align QA efforts directly with functional specifications.
- Executed functional, regression, and API tests while documenting technical risk assessments and QA metrics for global product managers.

EDUCATION

Postgraduate Degree in Software Engineering | Estácio de Sá University Graduated: 12/2022

Bachelor's Degree in Production Engineering | Veiga de Almeida University Graduated: 12/2014
